EXPERIENCE

InAmigos Foundation

Web Developer

May 2026 – Jun 2026

- Delivered web application features using modern web technologies, supporting functional and responsive user experiences.
- Developed responsive, user-friendly interfaces with attention to usability, performance, and cross-device presentation.
- Tested, debugged, and reviewed application code to identify defects and improve application quality.

PROJECTS

AI Interview Practice Platform | GitHub

Jul 2026 – Sep 2026

- Built 1 full-stack platform that analyzes resumes and generates AI-driven interview questions with voice-based practice using OpenRouter LLM integration and PDF parsing.
- Implemented 3 backend capabilities: JWT authentication, RESTful APIs, and Razorpay payment integration using Node.js, Express, and MongoDB.
- Secured file uploads with Multer and enabled cross-origin client-server communication using CORS.

AI Website/App Builder | Live Demo

May 2026 – Jun 2026

- Developed 1 full-stack AI SaaS platform using React, Node.js, Express, MongoDB, Firebase, Stripe, and OpenRouter AI.
- Engineered 4 core workflows: natural-language code generation, editing, deployment, and export for websites/apps.
- Implemented 3 security and billing capabilities: Firebase authentication, JWT security, and Stripe subscription billing with webhook verification.
- Designed REST APIs with Express and MongoDB/Mongoose and integrated OpenRouter API for AI-powered code generation.

AI Notes Generator | Live Demo

Mar 2026 – Apr 2026

- Developed 1 full-stack AI Notes Generator using React, Node.js, and MongoDB, leveraging Gemini AI to generate structured notes with Mermaid.js diagrams and PDF export.
- Implemented 3 major capabilities: JWT/Firebase authentication, Stripe subscription payments, and PDF-ready structured notes generation.
